

All About Love: Vintage Postcards

All About Love: Vintage Postcards is a collection of 20 love inspired postcards printed between 1900 - 1910. Some have poetic aspiration written on them; some serious and others humorous. Irrelevant of the setting, the sensuality and charged emotions that only lovers delight in has remained unchanged. Everything changes when loves in the air. Values may have altered since then, but the ambiance and mystery of falling in love is and always will be magical. Where would we be without love? If youre looking for a philosophical treatise about love, something profound, then this is not for you. If you want to chill out, then youre in the right place. The All About Love series is about sharing the joy and love of living simply and without expectation. Its about you. Its about me. Its about being present.

All about love is about us, finding joy in our surrounding, practicing mindfulness and living in the here and now.
