

## Video Spaces: Eight Installations (A Museum of Modern Art Book)

Space, time, love, violence, and the human body: these are but some of the themes explored in this provocative book of state-of-the-art video installations. Each a separate and carefully delineated environment created through multimedia technologies, the eight installations described and illustrated here were produced by an accomplished international group of artists: Judith Barry and Brad Miskell, New York; Stan Douglas, Vancouver; Teiji Furuhashi, Kyoto; Gary Hill, Seattle; Chris Marker, Paris; Marcel Odenbach, Cologne; Tony Oursler, New York; and Bill Viola, Long Beach, California. In the related exhibition, which ran at The Museum of Modern Art, New York, in 1995, the viewer entered the space and became part of what he or she observed. Vivid, complex, and endlessly inventive, these works demonstrate the range and sophistication of an art form born in the last decades of the 20th century.
