

McSe Test Prep: Windows Nt Server 4

The MCSE TestPrep series is a unique way of preparing for MCSE exams. The book is divided into 9 chapters. Each chapter covers a different exam objective. Each objective is further broken down into manageable sections. The information will be presented in a brief, outline format and will include an abundance of tables, figures, screen shots, and lists. Following each section will be a series of review questions, exercises, and answer explanations. Two complete practice exams and a glossary will be located at the end of the book.
