The #1 Amazon Bestseller in both featured categories, Entomology and Insects & Spiders has now been totally revised and updated in this new edition for 2012. Free Gift with Every Purchase! All purchasers are now entitled to download a brand new bonus book, Making Money With Honey - absolutely FREE! (See back of book for details) Hello! Thank you for taking the time to look at my book. If you have a taste for honey or an adventurous side, maybe you have thought of becoming a beekeeper. What would you really be in for, though? Is it really a job or is it a fun way to get your own honey? Well, it's really both. Being a beekeeper is a lot of work, but it also has a lot of benefits. Anyone can do it, as long as they are prepared. You can't just wake up one day, decide to be a beekeeper and start immediately. You have to know what you are doing. That's why I have written this book. Within its pages, you'll discover the tools you need to be a beekeeper, what to expect from your hive, how to harvest your honey, and how to protect the hive from various problems and invaders. I'll teach you what types of bees are best to keep, the jobs of each bee in the hive, how to choose and position your hives, and more. When I started keeping bees, I spent a lot of time and money on a lot of books before I was sure that apiculture was going to be a part of my life. This easy-to-read beginners book summarizes the essential information I have learned over the years and is written to help you decide if beekeeping will fit into your life. Best wishes, Frank
