In that case, you've come to the right place! Learning SQL is not an easy work if you don't have the RIGHT system. It requires time, money and desire. You must search an academy or a teacher, achieve coordination with them, or worse, adapt your own time to their class times. You also have to pay the high fees, month to month, and what is even more annoying is this: you will probably have to go to a special place in order to practice the SQL techniques! You see, when it comes to learning SQL we are ALL in the same game, and yet most people don't realize it. I made this crash course for a reason I made this course to give YOU a solution, to give you the RIGHT system. This crash course about SQL is not only going to teach you the basics of SQL in a didactic way, furthermore, you will learn SQL WHEN you want, and more important, WHERE you want (It could even be at your home!) I made this crash course to show you HOW you can learn SQL FASTER than you ever thought possible. I will teach YOU step by step SQL extremely quickly. I will TAKE you through a step by step guide where you simply can't get lost! This course-book will allow you to practice, learn and deepen your knowledge of SQL in an entertaining, interactive, autonomous and flexible course. End-of-Chapter Exercises Tell me and I'll forget. Show me and I may remember. Involve me and I learn. Because we know that: each SQL chapter comes with an end-of-chapter exercise where you get to practice the different SQL properties covered in the chapter. If you are determined to learn no one can stop you. Stop procrastinating and start NOW! Learning SQL is something that is a really worth investing time. The SQL course is
