

The HUE Book of Animation: How to make movie magic

Create movie magic using stop motion animation! This book contains complete step-by-step instructions for creating 20 hilarious stop motion videos, and ideas for even more. The HUE Book of Animation was designed to accompany HUE Animation Studio, a complete stop motion animation kit including a USB camera and dedicated animation software. Due to popular demand, its now been made available separately for existing animators and those who prefer to use their own software. The activities are universal and will work just as well on an iPad, phone or camcorder as they do with the equipment in HUE Animation Studio. The book contains simple diagrams and instructions for all of its activities. However, due to the complexity of some animation techniques we recommend that children under the age of seven are given assistance from an adult in order to get the most out of the book.
